University College London Hospital (UCLH) Collaborative Working Project (CWP) Executive Summary

Project title	A CWP to develop a UCLH Oncology Pharmacist (OP) led oral Systemic Anti-Cancer Therapy (SACT) clinic service for Low-Grade Glioma (LGG) patients.
Project rationale	In line with the NHS ten-year plan, national cancer plan, local UCLH strategy and the advent of additional cancer treatment options for LGG patients, UCLH anticipates a need to develop LGG oral SACT clinic service, led by an OP. To this end, there have been scoping conversations between the Solid Tumour and Cancer Lead Pharmacists, the General Manager of Chemotherapy and the Neuro-Oncology Consultants at UCLH (NHS team) and Servier to develop an 18-month CWP which enables the development and introduction of an OP led LGG oral SACT clinic service at UCLH.
Project objectives	The overall aim of the CWP is to develop an OP led LGG oral SACT clinic service at UCLH. This service will aim to help UCLH develop capacity, meet demand, manage waiting times and for the service to be financially sustainable after the CWP finishes. It will also aim to provide high-quality oral SACT and consistent care for these LGG patients. For the avoidance of doubt prescribing decisions by the NHS team and OP will be completely independent and not influenced by the CWP working partnership with Servier. Patients - Timely access to high-quality treatment and care, tailored support and advice and educational materials. - Sign-posted to other support organisations, charities and services. - Close monitoring for potential drug interactions and adverse event management. - Bloods taken on the day of the consultation. - Medicines dispensed from pharmacy or posted after consultation. - An opportunity to feedback on the LGG oral SACT clinic service, through the patient satisfaction survey. - Treatment and care in line with regional and national guidelines and waiting time standards. NHS - Building a business case for a new permanent and financially sustainable LGG oral SACT clinic service. - Improved consultation and communication skills for OP to conduct clinic conversations. - An increase in UCLH clinic capacity and consultations for LGG oral SACT, generating increased revenue for UCLH. - A new LGG oral SACT clinic service to help UCLH manage growing demand for cancer services and maintain cancer treatment waiting time standards. - A publication / poster to share the LGG oral SACT clinic service development best practice with other NHS sites.

	Servier - Build relationships and develop a trusted partnership with the NHS team. - Gain insight into the demands of the NHS, how the NHS team have developed services and to share with other sites via a project outcomes summary report. - The collaboration may enable more patients to access treatments in line with NICE guidance which may include Servier's medicines.
Project period	October / November 2026 to April / May 2028
Financial arrangements	The total cost of the full-time OP, over 18 months, to run the LGG oral SACT clinic is estimated at £125,189 with a 50% contribution coming from the NHS and a 50% contribution coming from Servier. The total cost of staff time dedicated to the CWP is approximately £5,000 with a 65% contribution from the NHS team and 35% contribution coming from Servier for SDM project management support. Servier will also fund three consultation and communication (non-medical) skills training sessions delivered by the Shine Cancer support organisation. All Servier funding will be disclosed on the Association of British Pharmaceutical Industry Database, Disclosure UK website.
Plans for publication	The co-production and publication of a project outcomes summary report and poster for the NHS team and Servier to share the CWP benefits with other NHS organisation to stimulate service development partnerships at 18 months.
Contact details	Shumi Tattersfield – Solid Tumour Pharmacist, UCLH Emma Morris – Cancer Lead Pharmacist, UCLH Chrissie O'Leary – General Manager of Chemotherapy Delivery, UCLH Brian Howson – Servier Service Delivery Manager (SDM): brian.howson@servier.com
Summary of the roles and responsibilities of each party	**The NHS team will undertake the following elements in relation to the CWP estimated at 60 hours:** - Recruitment, training and enabling OP to run new clinics. - Management and clinical oversight and supervision of OP / new clinics. - Engagement with the regional MDT to inform of the new LGG oral SACT clinic service at UCLH. - Clinic protocol and patient satisfaction questionnaire generation. - NHS Team / OP participation in Shine cancer support training program. - Collection and collation of clinical coded activity data stemming from clinics. - Participation in quarterly project meetings with Servier SDM to monitor progress of CWP to 3 monthly milestones. - Co-production of CWP summary report / poster. **SDM project management support throughout the CWP estimated at 40 hours:**

	- Ongoing liaison with the NHS team and discuss any CWP issue resolution and actions the NHS team may take. - Arrange and coordinate Shine cancer support charity consultation and communication skills training. - Organise and facilitate quarterly CWP project meetings to track CWP progress to 3 monthly milestones and record meeting minutes. - Send regular email summaries of CWP progress to the wider UCLH NHS team. - Receive and assemble CWP data from project meetings and draft a CWP project outcomes summary report and poster, in conjunction with the NHS team for publication.
